ABOUT KIPP NEWARK LAB HIGH SCHOOL

KIPP Newark Lab High School opened in 2019 as KIPP New Jersey’s second high school, starting with 9th grade and growing to educate students in grades 9-12. NLHS teaches students from KIPP middle schools (TEAM, Rise, NCP, and BOLD Academies) when they step up from 8th grade along with some new-to KIPP students from other Newark schools. Located in the Central Ward near NJIT and Rutgers Newark, NLHS offers a progressive, college preparatory educational experience, with a focus on project-based learning and design. AP course options offer students the chance to engage in rigorous learning, and students participate in clubs and sports at either KIPP NLHS or in conjunction with KIPP NCA.

ABOUT KIPP NEWARK

KIPP Newark schools are part of the nationally recognized “Knowledge Is Power Program” non-profit network of college preparatory, public charter schools educating elementary, middle, and high school students. In 2002, KIPP Newark first opened its doors in Newark’s South Ward as a single class of 80

fifth graders and has since grown to teach over 5,266 students in grades K-12 in Newark. Our goal is to enroll 7,800 students across 15 schools in Newark. Eighty-six percent of KIPP Newark students currently qualify for free or reduced meals.

KIPP Newark alumni earn college degrees at more than three times the national average for students from low-income families. By offering highly effective educators with strong bonds to families, more time in school learning, services that support a variety of student needs, and a culture focused on achievement, our students are on the path to and through college.

WHAT MAKES KIPP NEWARK LAB HIGH SCHOOL UNIQUE?

DESIGN THINKING

"Design thinking" is a framework for solving problems. Beginning in 9th grade, students will enroll in a Design Elective, where they'll learn some of the basic tenets of design thinking and engage in several design projects and challenges. Students will follow criteria like budget, size, or duration, map out the creation of a product, structure, or project, and then create! Be it documentary films, tiny houses, furniture, or functioning robots - all can be created using the techniques of design. Freshman will present projects

to their peers and family at the Freshmen Design Fair. And, by the end of 12th grade, seniors will use their knowledge of design to present their Life Design, where they will describe to an invited audience their five-year plan from the end of high school.

KIPP THROUGH COLLEGE

We support our kids to and through college. This goes beyond simply helping students find the school that's right for them. Our advisors arrange over 50 college visits, regularly meet students on campus, and host alumni events.

HOW ARE STUDENTS PROGRESSING?

MEASURING PROGRESS

NLHS provides students and families with ample data to measure progress. They include three ACT diagnostics each year so students can see their progress on college readiness standards, regular progress reports with academic data on class performance, reading growth data, among others.

RESULTS

KIPP New Jersey alumni are 3X more likely to graduate with a four-year degree and we send more African American students to four-year colleges than any other high school in Newark.

MEET DIANE REVALSKI, SCHOOL LEADER

Diane Revalski began her teaching career in Jacksonville, Florida district schools, teaching high school as a Teach For America Corps member, before accepting a role as an elementary school educator. She went on to become a founding first grade teacher at KIPP THRIVE Academy in 2013 and was named the school's first Assistant Principal in 2015, coaching teachers in grades three and four. As her students consistently met and exceeded literacy growth goals, she joined KIPP Newark's Teaching and Learning team to manage literacy across our elementary schools. In 2019, Revalski returned to her roots in high school education as a founding assistant principal at KIPP Newark Lab High School and became the school's principal in 2021. She holds a bachelor's degree in communications from Virginia Polytechnic Institute and a master's degree in educational leadership and administration from Montclair State University.
